2

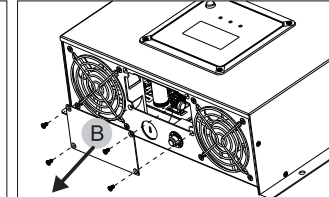

Take the GFCI kit out of its box. It comes with an attached connector **A**.

You will need the following tools.

Phillips Screwdriver Wire Cutter

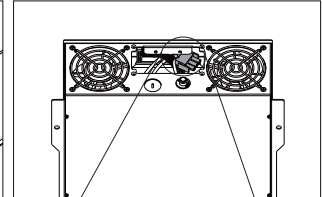

3

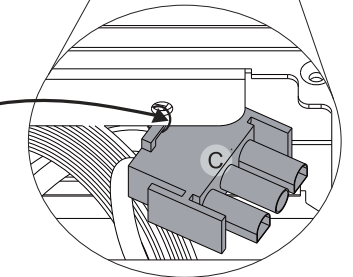

Remove the four screws and detach the cover plate **B** from the unit.

Set aside the screws.

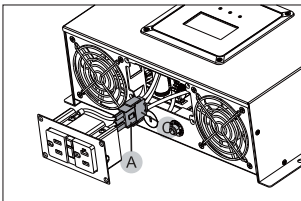

4

Cut the cable tie holding the unit's GFCI connector **C** to the bottom.

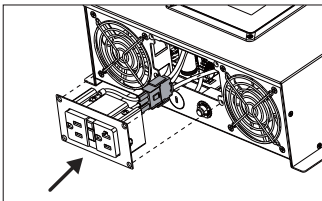

5

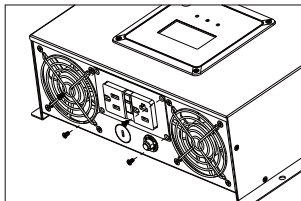

Attach the two connectors together **A** → **C**.

6

Mount the GFCI kit onto the unit.

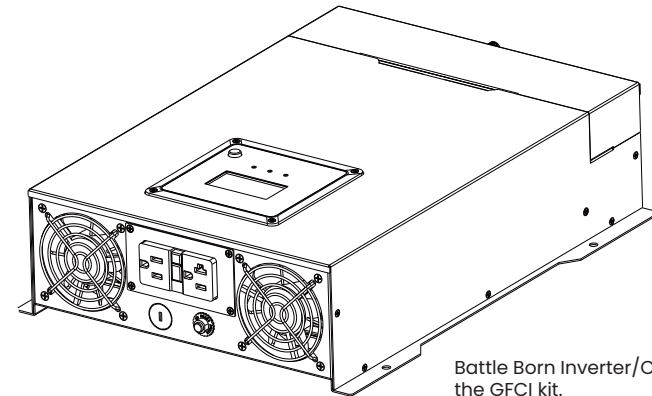

7

Secure the GFCI kit to the unit with the four screws from step 3.

Avoid damaging the screw heads when fastening. Do not over-tighten.
