

Victron Multiplus Inverter/Charger: The Victron Multiplus Inverter/Charger has a multitude of uses:

- Connect to Shore Power
- Recharge Batteries from Shore Power
- Deliver 120V AC Power to Desired Devices using either Shore or Battery Power

Connect the Battery Bank negative terminal to BAT (-) . Connect the Battery Bank positive terminal to the BAT(+) terminal *[left of the fuse]*. To connect to Shore Power, have an external male AC Power Plug connected to the AC IN terminals on the Inverter/Charger. Use the AC OUT terminals to deliver AC power for various devices. Please refer to your Victron Multiplus Inverter/Charger in-depth manual for further questions. A simplified diagram is shown below:
